ALUMINIUM DOORS

PERFECTION IN EVERY DETAIL

With entrance doors, the art of opening takes on a new meaning. Regardless of whether you dream of a modern, minimalist design or classic elegance, VIDOK aluminum doors will perfectly meet your expectations. By choosing our products, you are choosing not only style, but also an investment in durability and functionality. Discover how synergy design and solidity can transform your interior.

Our aluminum doors are not just a product, they are a decoration that highlights the character of your home. Give your entrance a new dimension with VIDOK aluminum doors - because you deserve perfection in every detail.

THE STRUCTURE ON WHICH YOU CAN RELY

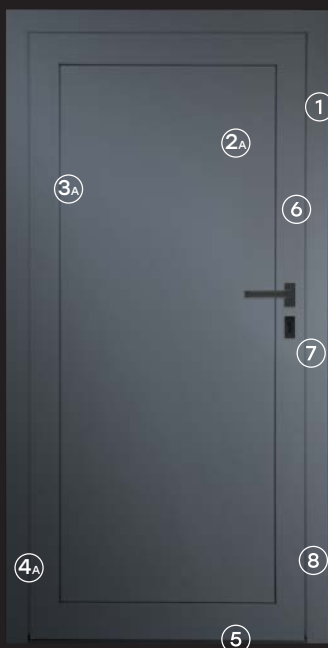

Dedicated to the most modern architectural solutions, where minimalism and purity of form are combined with the best utility parameters. Construction based on multi-chamber, thermally insulated aluminum profiles, enriched with special fillings flush with the surface of the frame.

Stable, with above-average durability, resistant to burglary and changing weather conditions. A wide range of finishing options will take you to a space full of beauty and comfort from the very beginning.

PANEL DOOR

- 1 Door frame based on a thermally insulated system sections with a construction depth of 70 to 95 mm.
- 2 Door panel filled with hardened polyurethane foam PUR or XPS, with high thermal insulation. Available in one-sided or double-sided aligned version, in many designs.
- 3 Decorative millings or optional stainless steel application aligned on one side or both sides.
- 4 Door hinges in a style that takes into account the latest trends. Available with roller or concealed hinges.
- 5 Low aluminum threshold with thermal insert and seal.
- 6 Automatic lock access control via numeric keypad, proximity reader, fingerprint reader, remote control or smart connect.
- 7 Class A or C door insert, optionally in a one key system.
- 8 Multipoint locking system. Available in automatic version.

FANLIGHT AND SIDELIGHT GLAZING

Door models can be enriched with fanlights and sidelights. They subtly illuminate the interior and increase the attractiveness of the building, adding character to it.

Product is outside the standard price list; please contact us for details.

A wide range of solutions provides almost unlimited possibilities for door design, which allows each structure to be adapted to the investor's individual expectations.

Benefit of glass unit is not only to let daylight into the building, but above all to protect it rooms against heat loss, sunlight, noise and burglary. Glass also has a decorative function. The Ornament subtly disperses the light, giving a sense of privacy and comfort.
